DinoCapture 2.0

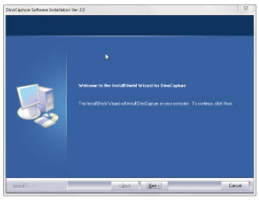
Quick Installation Guide

http://www.dino-lite.com

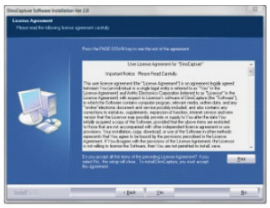
DO NOT connect the USB cable of the Dino-Lite or Dino-Eye to the PC before installing the software.

1 Power on your PC and insert DinoCapture 2.0 installation CD into CD-ROM drive. The installation wizard should start automatically.

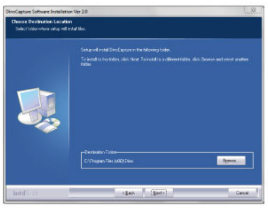
2 Click "Next" and the Install Shield Wizard for the DinoCapture 2.0 will start.
(The "Open File-Security warning" may appear on some systems. Select "Run")



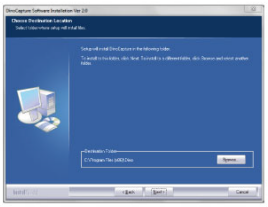
3 Read the User License Agreement. If agree, press "Yes" to continue or "No" to stop the installation.



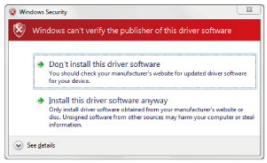
4 Select a destination folder for the DinoCapture 2.0 software. When done press "Next"



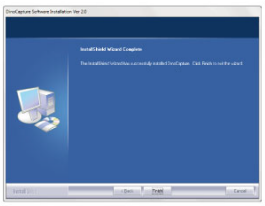
5 Click "Install" to start installing the software.



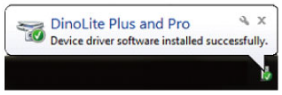
6 If the Windows Security warning message appears, click "Install this driver software anyway".



7 When the installation is complete, selecting "Finish" completes the software installation.



8 Now plug in the Dino-Lite to start the Driver Installation. A bubble will pop up saying "Installing device driver software".
Please WAIT until Windows says "Device driver software installed successfully" for completed device driver installation.



9 Start DinoCapture 2.0 by double clicking the desktop icon.*

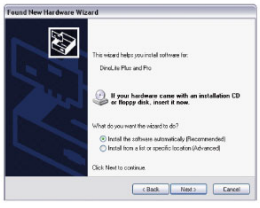
****Windows XP Users continue reading steps 10-15 for Driver Software Installation instructions-Found New Hardware Wizard.***

---

10 Plug in the Dino-Lite to start the Found New Hardware Wizard.

11 Select the "No, not this time" radial button. And then press "Next".

12 Select "Install the software automatically" radial button then press "Next"



13 If the Windows Logo testing warning appears select "Continue Anyway".

14 Click "Finish" to complete the installation.

15 You can now use the Dino-Lite with the DinoCapture software.

Note: Please refer to the User's Guide in the DinoCapture 2.0 "Help" menu to learn more about DinoCapture 2.0 software.
